

Westwood gunmetal self tapping ferrule straps enable a number of service pipe types to be taken off a barrier pipe water main.

Supplied with stainless steel bolts and nitrile 'O' ring, Waterfit straps fit securely around the mains pipe. Housed inside a ferrule and shielded by a protective cap, the self tapping cutter removes the need for a drilling machine.

The only tools required to fit a Westwood ferrule strap are a

spanner and standard ferrule key. Furthermore, the installer-friendly design enables service pipes to be simply fitted in trenches, confined spaces and the wettest of weathers.

Female Iron (Gunmetal)

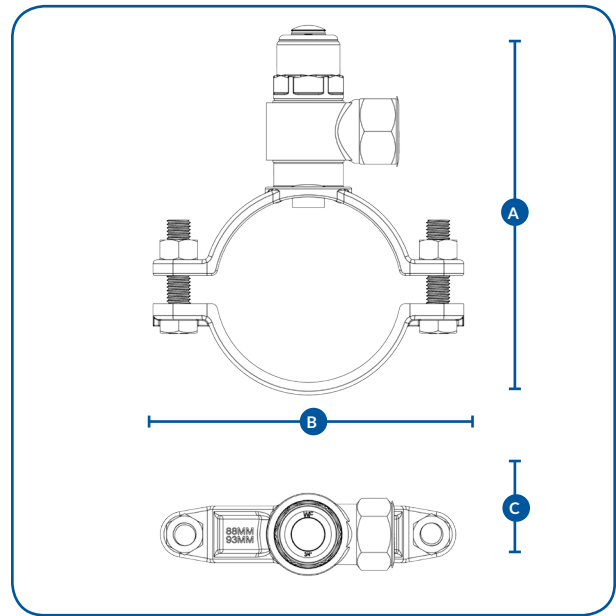

BSP female threaded gunmetal banjo allowing connections to 1/2", 3/4", or 1" male threaded adaptors.
